This is in reply to your letter of May 16 concerning OSS originated material in our files.

We regret that you must postpone your trip to the Library, for we would like to have this material declassified. Perhaps instead of your coming to the Library, we could arrange to send copies of the documents to you in installments. If these items are sent to you in Washington you will have an opportunity to check them against Agency holdings. With the exception of a few documents in scattered files that are classified Top Secret, everything is classified Secret or Confidential and could be sent through the mail. I plan to bring those few Top Secret documents to Washington when I come down for a conference the first week of June.

I appreciate your assistance in this matter.

Sincerely yours,

J.C. JAMES
Director
